

## Franz Pfannl 2mm Berloque Rifle with Bayonet and Mahogany Stock

**\$450.00**

### **Franz Pfannl 2mm Berloque Rifle with Bayonet and Mahogany Stock**

These are the 2mm Berloque rifles as seen in "The Tiniest Guns" book by **Bob Urso** on page 29 listed as A31. These Pfannl rifles have mahogany stocks and the OAL is  $5 \frac{3}{16}$  with the bayonet. These rifles are all in conditions ranging from Good to Excellent with leather straps and they are very good serial numbers (15, 31, 38, & 837) which 3 of the are very low numbers. These are getting to be almost impossible to come by, and I haven't seen any for sale anywhere else in a while. You used to be able to find one on eBay every 3-4 months, now you are lucky to see one every 6-9 months. The last one that I saw that was of this quality, sold on eBay, sold for over \$500.

The rifle shown in the photo is an example of the quality of the rifles that we have for sale. You may not receive this exact gun, but one of the same quality or better. We are working on getting the photos of each one posted very soon.

Serial number #31 reserved for Peter Harrington.
